ABOUT

Have you heard about Go! Garrett County?

It's a county-wide initiative that rewards participants for learning about community resources. It's an incredible free marketing opportunity- they are giving people really great prizes to learn about your business, club, church, etc.

Want to participate, but aren't sure if you are a community resource?

Traditional community resources start with organizations that focus on helping people, such as support groups and agencies, but the definition of community resources is much broader. It includes public services, such as libraries; gathering places, such as community centers and churches; and businesses that serve the community by providing jobs and easy access to necessary products. Individuals who work to improve community life by helping others, cleaning up the community, or organizing informal community activities are also community resources.

How Do I Get Featured?

Send your video to gogarrettcountry@gmail.com using wetransfer.com along with a brief written description of the content including how the resource your sharing has the potential to bring improved quality of life to the community and your contact information.

Can I still participate in the program and earn prizes if I'm a featured resource?

Yes! Anyone over the age of 13 can participate.
